Creating a Complete Project Performance System with Primavera

project success=business success™

PRIMAVERA®

Primavera Cost Management

Primavera Cost Management is a comprehensive cost management and earned value module for Primavera's scheduling suites.

Cost Management is for organizations that have:

- **Pressure to Maintain Control –** Without proper measuring systems, troubled projects can quickly spiral out of control before anyone even realizes the problem
- **Pressure to Measure Performance** – Government regulations and securities laws are forcing companies to measure and report performance based upon accepted standards
- **Pressure to Improve Forecasting** - Without a clear understanding of upcoming resource and financial needs, schedules may be delayed due to insufficient resources or costs may be unnecessarily high due to unused capacity.
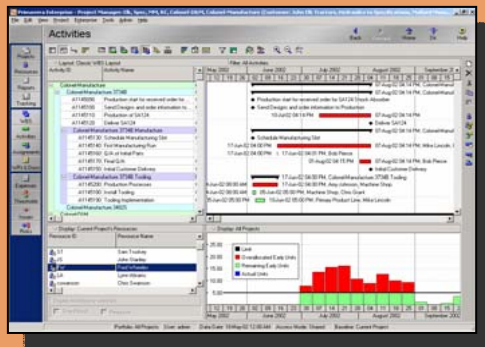

PRIMAVERA®

# A Comprehensive Cost and Earned Value Management Solution

Plan-Execute-Repeat

Measure-Understand

Part of a Whole Product Solution

- **Plan** - Align project portfolio with strategic business objectives
- **Execute** - Complete Projects faster and more efficiently through role-based alignment
- **Measure** - Accurately measure both cost and schedule performance
- **Understand** - Efficiently and accurately analyze and present data
- **Communicate -** Increase program visibility through effective and streamlined communication with all stakeholders
- **Repeat -** Adopt best practices to ensure project repeatability

project success = business success™

PRIMAVERA®

Solution Features

Leverage Primavera into a complete
Earned Value Management System

- **Comprehensive Cost Management** – Apply complex indirect costs to base costs, including escalation factors, overhead calculations, and other associated burdens, to better measure total project costs

- **Unified View of Cost and Schedule** – Flexible interfacing module ensures a consistent and complete view of project performance

- **Period Based Reporting** – Segment data by past and future periods for consistent reporting and analysis of performance trends

- **Earned Value Analysis** – Better understand and communicate project performance with embedded reports and interactive graphics

- **Project Portfolio Support** – Analyze an entire project portfolio for a complete view of project performance

PRIMAVERA®

project success = business success™
